
Arise Centre

Greenwood Roche assisted Arise with its flagship church project in Petone.

Greenwood Roche acted for Arise on the construction of its distinctive new build church, the Arise Centre, in Petone, Wellington.

The Arise Centre has now received an NZIA Local Architecture Award, recognising the Centre as being amongst the best new architecture in Wellington. The “new take” on church architecture enables the congregation to be brought together in a large space where it can make some noise. Located in a relatively sparse former industrial space, the building comes into its own at night, imbued with a golden light.

The Greenwood Roche team for the project included partner Doran Wyatt and principal James Riddoch.
