
Central North Island iwi forestry investment

A consortium of Central North Island (CNI) iwi own 176,000 hectares of land, predominantly forested, as a result of a Treaty settlement.

Greenwood Roche acted for The Treasury on the settlement and establishment of the consortium structure and have now acted for the consortium in acquiring a significant share in the Kaingaroa Timberlands Limited forestry business from the New Zealand Superannuation Fund. This is a co-investment with the Fund, the Canadian Public Sector Pension Fund and a Harvard College investment entity.
