
Establishment of CarboNZero Certified Ecotricity Limited Partnership

Ecotricity is New Zealand's only "carboNZero" certified, 100% renewable electricity retailer. This means that it sources electricity only from sustainable and renewable sources, such as hydro and wind.

Partner Brigid McArthur recently acted for Ecotricity Limited on the establishment of the joint venture, by way of limited partnership, with Pioneer Generation Limited. Pioneer owns and operates some significant renewable generation projects in the South Island. The Ecotricity Limited Partnership is also investing in electric vehicles and associated infrastructure.

Together, Ecotricity and Pioneer are championing the case for investment in renewables and we congratulate them on their venture. They are at the forefront of what is a growing trend away from conventional fossil fuel based technologies. Your support can be enhanced by visiting the Ecotricity website and checking the deals on offer. www.ecotricity.co.nz
